# OIL & GAS GLOVES

## TECHNICAL GUIDE

This standard applies to all kinds of protective gloves in respect of physical and mechanical aggressions caused by abrasion, blade cut, puncture and tearing.

**EN-388**

**1 2 3 4**

abrasion resistance \_\_\_\_\_  
blade cut resistance \_\_\_\_\_  
tear resistance \_\_\_\_\_  
puncture resistance \_\_\_\_\_

# RIGGER

## FEATURES

- + Oil resistant DuPont™ Kevlar® fiber palm provides extreme abrasion resistance
- + Stretch DuPont™ Kevlar® fiber finger sidewalls for additional abrasion protection
- + Full finger, knuckle and metacarpal TPR impact & crush protection
- + Perforated 5mm internal padding provides secondary impact protection to dorsal region of hand
- + Pre-curved palm for added dexterity and comfort

## THERMAL TAC

Full nitrile dipped protection for handling oils, greases and solvent covered materials

### FEATURES

- + 13 Ga. Polyester Staple Fiber (PSF) liner offers a snug fit for greater feel, warmth and outstanding comfort
- + Poly Staple Fiber is advantageous because it is lightweight, durable and form fitting
- + Crinkled latex dipped palm and over fingertips for enhanced gripping power on wet/slippery applications
- + Latex palm offers excellent tear resistance and durable abrasion/puncture protection
- + Seamless knit construction reduces snagging
- + Ergonomically shaped to the contour of your hand for improved comfort, control and flexibility
- + Rolled knit cuff secures the glove to the wrist and prevents contaminants from entering
- + Ideal for outdoor hand and power tool use, cold stocking/storage, shipping/receiving, construction, maintenance, automotive

## FEATURES

- + 10 Ga. Brushed Acrylic Thermal Liner keeps hands extra warm and comfortable
- + Acrylic is a synthetic fiber that is lightweight, soft, and warm, with a wool-like feel
- + Synthetic Acrylic is resistant to oils, chemicals, and is very resistant to deterioration from sunlight exposure
- + Crinkled latex coated palm and over Fingertips for enhanced gripping power on wet/slippery applications
- + Latex palm offers excellent tear resistance and durable abrasion/puncture protection
- + Seamless knit construction reduces snagging
- + Ergonomically shaped to the contour of your hand for improved comfort, control and flexibility
- + Rolled knit cuff secures the glove to the wrist and prevents contaminants from entering

## 100% NITRILE DISPOSABLE 5 MIL, 9.5" INDUSTRIAL GRADE GLOVE

## FEATURES

- + Ideal for working with solvents, Nitrile is chemical resistant and helps dissipate electrostatic charges
- + Powder free where contamination is a concern and contains no natural rubber proteins known to cause allergic reactions
- + Compliant to FDA food handling requirements  
Meets FDA 21 CFR 170-199 specifications
- + Form fitting for superior comfort and dexterity with textured fingertips for greater tactile sensitivity and grip on slippery surfaces or applications along with excellent chemical resistance
- + Suitable for applications where gloves are frequently replaced
- + Black nitrile gloves are most commonly used by workers in automotive, electronic assembly, law enforcement, security environments, tattoo shops and beauty salons
- + Black nitrile gloves allow instant hand protection without the visibility of blood, dirt and other contaminants

# COOLING GEAR

## FEATURES

---

- + Evaporation cooling system
- + Can be used with or without hard hat
- + Constructed of lightweight multi-fiber polymer embedded fabric
- + Helps regulate temperature to protect against heat exhaustion and heat induced stress.

## HOW IT WORKS

---

- + Heat from outside activates the saturated cooling garment, creating evaporation.
- + As water evaporates, warm air is extracted away and delivers cool air to your body.

## NECK SHADE

- 1: Submerge item into water for 1-2 Minutes
- 2: Gently remove excess water
- 3: Re-hydrate as needed

## CROWN COOLER / NECK SHADE

# LIFT CUSTOM FORCE

BACKED BY OVER 20 YEARS OF SAFETY INNOVATION, LIFT IS PROUD TO ANNOUNCE IT'S CUSTOM FORCE PROGRAM

# CUSTOM FORCE IN ACTION

In October of 2006 Lift Safety was approached by Precision Drilling to design and develop a glove that would reduce or potentially eliminate one of the more common work related injuries...HAND and FINGER INJURIES.

Over the course of 16 months, 7 prototypes and more than 25,000 hours of field testing resulted in a glove that went beyond Precision Drilling's expectations.

In July 2008 Precision Drilling received their first production shipment and implemented the Rigger Glove into their safety program.

## LIFT CUSTOM FORCE IS A POWERFUL PRODUCT DEVELOPMENT LAB

LIFT CUSTOM FORCE is a product problem-solver that enables you to come up with a custom solution to your specific safety product needs.

Do you need a glove that performs better than anything currently available for your special application or do you need a safety glass that is comfortable but has a unique feature that you haven't found yet in the market?

This is where LIFT Custom Force comes in.

We provide access to our product development lab to co-develop a product that 100% meets your needs: YOUR idea, our developers, and with the legendary LIFT quality built in from the start, so it'll last past the finish.

Ask your LIFT Safety team member for more information.

# EVS-LIFT CONNECTION

**WORK HARD. PLAY HARDER.**

In 1985 two gentlemen developed a strategy that would forever change and revolutionize the sport of motocross. Over the last quarter of a century EVS Sports has become the leader in innovation and advanced technology, developing head to toe products for the majority of today's extreme sports athletes. What started out as one knee brace has evolved into an extensive line of knees braces, neck supports, helmets, chest/back protection and a long list of protective gear products to keep any athlete safe when doing what they love. We pour the same amount of dedication and determination into our products as you do into becoming the best that you can possibly be.
