BUILDER SERIES **Mechanical Thermostats**

Finally, an affordable mercury-free mechanical thermostat that you can use on every job! Braeburn 500 Series thermostats are the perfect alternative to most common mechanical thermostats. Our megaswitch® magnetic switch technology provides performance and reliability you can depend on.

Our integrated sub-base and front mounted wiring terminals make installation quick and easy. The mercury-free design of our 500 Series eliminates leveling during installation, saving you time on the job!

megaswitch® Magnetic Switch Technology

Our megaswitch® magnetic switching technology provides an extended switch life, giving you the durability and reliability needed to replace common mechanical thermostats on every job!

Fast and Easy Installation

Integrated sub-base and front mounted wiring terminals make our mechanical thermostats easy to install in any residential or new home construction development.
