

TrueZONE® HZ221 Panel

Heat Pump Zone Control System

Honeywell

HZ221 is the ideal solution for single stage heat-pump with auxiliary heat applications at an affordable price. Requires no configuration and makes installation quick and easy. Built with TrueZONE innovation and Honeywell reliability.

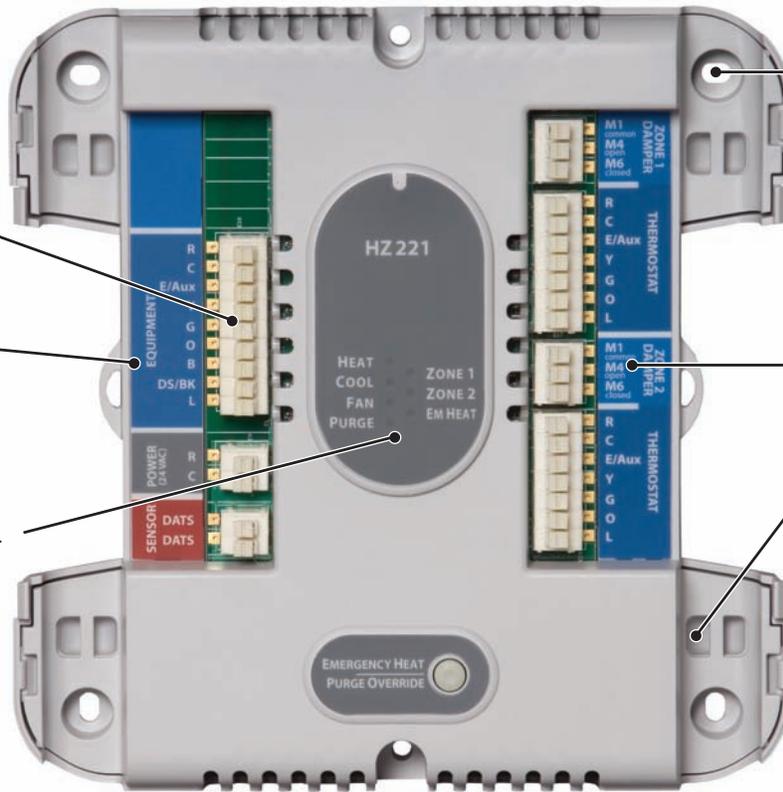

TrueZONE® HZ221 Panel

HEAT PUMP ZONE CONTROL SYSTEM

Push Terminals — Robust push-in terminal blocks wire in literally half the time compared to screw terminals. Up to two wires per block.

Heat Pump Control — Single stage heat pump with auxiliary heat.

Common-Sense LEDs — Indicate which zones are calling for heat or cool and when emergency heat is on.

Mounts Anywhere — Only 8" tall and wide, mounts on 2x4 or wall and in hot attics up to 165° F.

Compatible — Control two zones with any Honeywell heat pump thermostat.

Clean, Professional Installation — Patented wire channel allows installer to run wires on the side, top, bottom, or backside of the panel and wire anchors to help hold wires in place.
