

CONNECT WITH COMFORT.

The Daikin D2271 connected thermostat is ideal for standalone applications, especially in homes with older heating and cooling systems, and integrates seamlessly with Daikin's *ALTHERMA* 3-in-1 solution for heating, cooling, and hot water. It also plays a key role in hybrid installations — when a homeowner adds a Daikin *FIT* system but has one or more legacy systems, including other brands, the D2271 can be added to the legacy system allowing the homeowner to monitor and control using Daikin's *SkyportHome* app.

Key Features & Benefits:

- » **Mobile Access:** Homeowners can utilize *SkyportHome* to access their thermostat from across the room or across town.
- » **Connectivity:** Wi-Fi-enabled, allowing homeowners to sync with Amazon Alexa or Google Assistant for voice control (compatible with both iOS & Android devices).
- » **Indoor Comfort and Water Temperature Monitoring:** From a smart device, homeowners can not only monitor and control indoor temperature but also keep track of the water tank temperature for the Daikin *ALTHERMA* 3H HT system.
- » **Scheduling and control:** Program the thermostat to align with homeowner needs. The D2271 offers features such as: Adjust modes (Auto/Heat/Cool/Aux Heat/Emergency Heat), setpoints (Single/Dual), fan speed, and fan operation modes (On/Auto).
- » **Integrated Temperature and Humidity Sensors:** Built-in sensors actively monitor your indoor environment for optimal comfort.
- » **Over-The-Air Software Updates:** Up-to-date functionality with streamlined software updates via Wi-Fi.
- » **Efficiency:** Take advantage of the included features like Away Mode and Geo-Fencing, to help with energy-saving and set-point adjustments with ease (as long as there is an internet connection).
