

## Amana® Brand D24V Gateway

When a full system replacement is not a chosen option, a partial Amana brand S-series system is now a possibility. Also, the D24V Gateway offers a great comfort upgrade solution for homes with only heating/furnaces.

The D24V Gateway allows you to connect to any non-communicating gas furnace when a communicating indoor unit is not a chosen option when installing with the Amana brand S-series condenser and coil. The D24V Gateway is compatible with the following:

**Amana S SERIES**

Compatible with all  
Non-Communicating  
Gas Furnaces  
(Any Manufacturer)!  
Compatible with North and  
Southeast models only.

- Amana brand S-series AC/HP ODU
- CAPEA/CAPEA/CAHEA EEV Coil
- Amana brand smart thermostat
- Clean Comfort line of IAQ solutions compatible (see below)

<b>D24V Gateway</b> <b>DTA119A73</b>

Enjoy the fantastic features of Amana brand S-series inverter side discharge unitary outdoor unit! As low as 56dBA sound, compact foot print, lightweight, swing compressor, Blue Fin corrosion coating and multiple mounting options (wall, 4" from wall, patio, balcony, stackable). Learn more at <http://www.amana-nac.com/products>.

### Quick Mount

Mount the D24V Gateway adaptor (DTA119A73) on a place which has sufficient strength and stability. To avoid damage to the DTA119A73, DO NOT mount the adaptor to any:

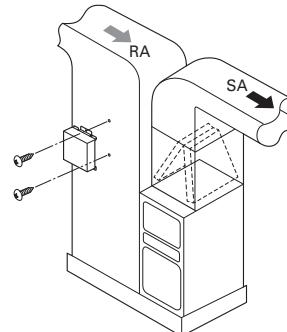

- Supply duct.
- In a place that has risk of vibration or water droplets.
- Directly to any air handler, furnace, hot water coil or evaporator coil in the area.

### Dehumidification

Field selectable dehumidification settings to accommodated homeowner preferences

- It is recommended to use setting "B" as a starting point and adjust as applicable for region or customer preference. Refer to page 12 of the installation manual.

Compatible only with the following items: Amana® brand S-series AC/HP, CAPEA, CHPEA, or CAHEA cased coils and Amana brand thermostat. North and Southeast models only.
