

Comfort Solutions for Hot and Cold Spots.

Experience indoor comfort without hot or cold spots.

Daikin mini-splits are a perfect addition to your home's HVAC system where poor airflow, insulation gaps, and uneven heating or cooling can leave certain areas of your home uncomfortable. Targeting these problem areas is smart and can be the key to great comfort and energy efficiency.

Daikin ductless solutions are designed to deliver precise, room-by-room temperature control without the mess or cost of major renovations — helping you create a balanced indoor environment, wherever you need it most.

Why Daikin ductless systems are perfect for hot and cold spots:

Flexible, Space-Saving Design: Mini-split systems are compact, ductless, and can be mounted on walls, floors, or ceilings.

No Ductwork Required: Skip the hassle and expense of reworking existing ductwork or installing new runs in hot or cold spot areas. Mini-split systems don't require ducts and feature minimal installation work, making them a cost-effective choice.

Quick Installation: Mini-split systems can be installed in a few hours* and with minimal disruption to your property, allowing you to utilize your new, comfortable area fast. Some Daikin systems operate on 115V, making them compatible with standard residential electrical systems without the need for an electrical panel upgrade.

Quiet Operation: Mini-split systems operate quietly, ensuring a peaceful atmosphere for everyone.

Examples of hot and cold spot areas:

- » Main bedroom
- » Kitchen with large windows and/or appliances
- » Room above the garage
- » Corner room with excess sun exposure
- » Room with minimal insulation

* Installation time may vary based on job scope and conditions.

Why choose ductless HVAC for your hot and cold spots?

Energy Efficiency: Mini-split heat pump systems are designed to provide all-electric, year-round indoor comfort while consuming less energy than traditional single-speed ducted HVAC systems. This means low utility bills and a small carbon footprint.

Zoned Comfort: You control the temperature in a room or zone independently, ensuring your new space remains comfortable without wasting energy on unoccupied areas. And you can easily turn them off when not in use, without affecting the rest of the house.

Improved Air Quality: Some mini-split systems come equipped with advanced filtration technology that helps remove dust, allergens, and other pollutants from the air. For extra dusty environments, ask about the Daikin Room Air Purifier.

Warranty: Daikin ductless mini-split systems offer a 12-year Parts Limited Warranty**

What should I consider before taking the next step?

Professional Assessment: Consult with a Daikin *Pro* for a precise load calculation to determine the correct size for your mini-split system. The Daikin *Pro* will also recommend the ideal installation location, the type of system best suited for your needs, highlight financing options (for qualified buyers), and inform you of any applicable tax credits[^] and incentives.
